Project Kick-Off

DET VT26

Luis Quintero | Jordi Solsona

https://extralitylab.dsv.su.se

2026-02-16

Stockholm University

Course Aims

Upon successful completion of the course, the student should be able to:

- apply and discuss current **creative and immersive technologies**
- apply and discuss concepts, **methods, workflows, tools** and selected **standards** for creative and immersive technologies
- reflect on **opportunities and challenges** in designing for interaction facilitated by creative and immersive technologies.

Stockholm University

Evaluation Criteria

The course consists of 7.5 credits divided in two parts:

A. Individual Assignments (3.5HP = 35 pts) ✅

B. Course Project (4HP = 40 pts)

Mapping from percentages to letters*:

A (>=95%)	B (>=85%)	C (>=75%)	
D (>=65%)	E (>=55%)	Fx* (>=45%)	F**

** Maximum grade obtainable after an Fx is E.*

*** Should register to the next version of the course.*

Stockholm University

Evaluation Criteria - Individual

A. Individual Assignments (3.5HP = 35 pts)

[4pts] **Attendance**: % depending on course attendance
(Half-attendance if more than 10min late)

[5pts] **Review of 3D interactions**:
Short review on interactions from published immersive applications.

[3pts] **VR design document**:
Plan for the development of a functional prototype with immersive 3D interactions.

[3pts] **Immersive+Tangible design document**:
Simple design and development of individual prototype with bidirectional communication between virtual and e interaction.

[7pts] **Functional Experience (Immersive)**:
Development of individual prototype with 3D interactions.

[7pts] **Functional Experience (Tangible)**:
Development of individual prototype with bidirectional communication between virtual world and physical tangible interaction.

[6pts] ⚠️ **In-class quizzes**:
Based on lectures and seminars. 3 x quizzes [2 pts/each]

Open Exhibition Day at Extrality Lab

Wednesday 2026-03-18

10h-12h: preparation
13h-16h: exhibition

Task:

You are experts with the goal of creating an exhibition at Extrality Lab showcasing the potential of immersive technologies and embodied interactions. The general public will visit, as in a technical museum, wanting to **have fun!**.

Your experience should elicit positive reactions: laughter, smile, surprise, unexpected events.

Stockholm University

Open Exhibition Day

- An experience combining virtual reality and embodied interaction
- Groups of **2**, **3**, or 4* people
    - ** larger groups = higher demands in design and tech*
    - *Groups restricted by headset availability (~12 units)*
- Duration: Maximum 3 minutes
    - *including time for onboarding, tutorial, data collection.*
- Visitors will come to enjoy a novel experience through technology
    - *Not to listen to what you did in the course and how you implemented it…*
- Experience demonstration protocol for:
    - Onboarding/Alignment
    - Tutorial (if needed)
    - Main Narrative (technology, interaction, and story)
    - Exit

Stockholm University

Ideas...

- An experience to explain a complex educational concept
- An immersive interactive storytelling
- An abstract experience
- An artistic performance (mixing VR and non-VR users)
- An experience with magic tricks
- Inspiration from social media. E.g.,
    - IG: UnnecessaryInventions | YT: Alt.Ctrl@GDC | LinkedIn: “XR+AI”

- **An adaptation from your individual projects**
- … or create your own fun idea!

TIP: Create a portfolio project that you’d be proud to showcase to future employers, social media, or publish your app on the Meta Store!

Deliverables Course (4HP = 40 pts)

- **[5pts] Individual Short Interview**

- **[15pts] Interactive Experience**
  - [5 pts] Demo Plan
  - [10 pts] Open Exhibition Demo Day
- **[10 pts] Documentation**
  - [2pts] Poster in size A1
  - [3pts] Video Portfolio
  - [5pts] Git Repository
- **[10pts] Presentations**
  - [2pt x 3] Intermediate presentations (every Friday)
  - [4pt] Final presentation on March 20th

Stockholm University

Grading Criteria

[15pts] Interactive Experience

Design and showcase of an experience merging virtual and embodied interactions. It will be displayed during the Open Exhibition Day with basic user testing protocol for participants.

- [5 pts] Demo Plan
  - 0pt: No demo
  - 3p: Demo plan with complete annotated checklist and a complete protocol
  - 5p: Comprehensive reflection on how the design principles from research impact the facilitation of the demonstration and potentially the interactions of the experience.
- [10 pts] Open Exhibition Demo Day
  - 0pt: No demo
  - 3 p: The functional demo is exhibited.
  - 6p: The demo is well executed according to the Demo Plan.
  - 8p: The demo has great execution from the design/performative/ambience perspectives
  - 10p : Orchestration of creative elements to add value to the visitor's experience, beyond expectations.

Stockholm University

Grading Criteria

[10 pts] Documentation

- **[2pts] Poster in size A1:** The poster should be submitted few days before the exhibition day, so that the course coordinators can print it at DSV.
  - 0p: Poster with a single AI-generated image or lack of context of the experience
  - 1p: Poster with several images, title and team members
  - 2p: Poster reflecting real-world experience with tangible and digital elements.
- **[3pts] Video Portfolio:** 1-min portfolio video showcasing the project. The video should be submitted before the public exhibition so that it's available in the showcase session.
  - 1p: Video with screen recording and images of the project with basic contextual texts
  - 2p: Video with sections that describe the design rationale and technical implementation
  - 3p: Structured self-explanatory video that for general audience to describe the experience and generate interest, could even be published online.
- **[5pts] Git Repository:** Online repository in GitHub/Gitea to be shared online for future course versions.
  - 2p: The git repository contains commits spaced out throughout the project timeline.
  - 3p: The git repository showcases that all team members contributed.
  - 5p: The git repository contains a comprehensive README file describing the design, digital, and tangible aspects to reproduce the project in the future (see example README on nextiLearn).

Grading Criteria

[10pts] Presentations

Be able to attend and present the final project in front of classmates and course coordinators. The presentation should be max 5min.

- **[2pt x 3] Intermediate presentations:** Presentation of weekly progress every Friday. The presentation should include a description of the design space, intended users (persona), proposed experience, implementation progress (deliverables + next-week plan + Q&A).
  - 0p: Presentation not being rehearsed, no clear progress in the week, or no clear plan ahead
  - 1p: Presentation includes an updated Interaction Design Document and technical update
  - 2p: Presentation includes learned lessons, bottlenecks, and action plan for next week.
- **[4pt] Final presentation:** Pitch your project and include reflections from the evaluation during the Open Exhibition Day.
  - 2p: Presentation includes same parts than the intermediate presentations
  - 3p: Presentation includes a concrete critical reflection on designed interactions
  - 4p: Presentation includes preliminary results from user feedback during Open Exhibition Day

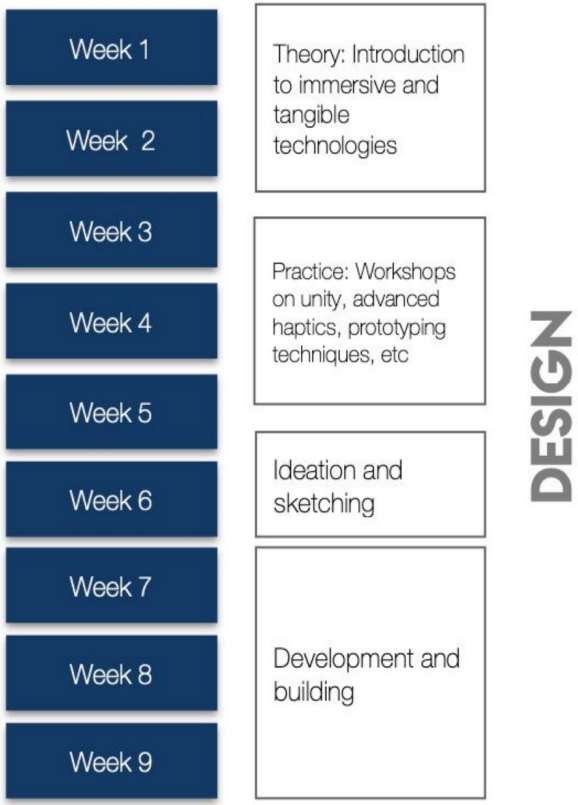
Stockholm University

Course Project Development

- Afternoons at Extrality Lab are open-space to work on course and thesis projects.
    - Revisit the lab rules. Report misconduct.
    - **Share!** 😊
- Progress presentations every Friday.

Tips

- Setup communication and preliminary plans early
- Apply your knowledge on design processes and tools (e.g., bodystorming, sketches, post-its, miro boards)
- Avoid biases towards development and *“hang a bit longer to the problem” [Charles]*



Extrality Lab: You will have free access 🎉

- Lab is open between 8am-8pm
  - Lectures 8am-1pm
  - Open space 1pm-8pm

- Deactivate alarm if the door is locked

If 🔴, **B2 + card + pin & wait 15s until** 🟢

- Access comes with **responsibilities**.
- Read the **lab rules** thoroughly and <u>understand</u> them.
- Adhere to the **procedures** in the email templates to request equipment or report a fault.

Reporting Misconduct

If you witness or experience misconduct, report it to the responsible staff members immediately. Your concerns will be taken seriously and handled with confidentiality.

⚠️ **Failure to adhere to the Code of Conduct may result in consequences, including but not limited to: *temporary or permanent revocation of lab access.***

Stockholm University
